## What is the power behind an idea?

An idea can change the world. It can forge the incredible. It can generate an extraordinary revolution. An idea is born in the present, **but carries with it a sense of what the present can become.**

Dalma believes in *innovation*, in the *power of change*, in *new opportunities* in the *constant pursuit of progress*.

**Dalma is your ideal partner in the design and implementation of systems for machining sheet metal coils. Our real-time service delivers customised, flexible, compact, high-performing solutions.**

Idee per il futuro

Every idea is an opportunity that can turn into a reality and anticipate the future. This is the main principle underlying our daily work; it is the goal we set out to achieve alongside our customers, so as to ensure them the best conditions for growth.

## Our philosophy is expressed in the following manifesto.

### COLLABORATION

*We believe in developing solutions that exceed your expectations.*

### TRUST

*We believe in quality relationships, as well as quality products.*

### COMPETENCE

*We believe in converting ideas into safe, sound, high-performing solutions.*

### RELIABILITY

*We believe in acting as partners, not just suppliers, and in remaining firmly by your side.*

### SPEED

*We believe in speed, so as to enable you to work in the best possible conditions.*

### IDEAS

*We see ideas are the most powerful resource in existence; a chance for you to fulfil your potential.*

### GROWTH

*We support your growth so that you can remain competitive at all times.*

### FUTURE

*We see the future as the horizon ahead, the hope for a better morrow.*

# Over 50 years of experience

*Diego Bergamin, Alberto Dallan, Danilo Dallan*

Dalma was founded by **Danilo Dallan**, an established professional specialised in the development of sheet metal machining systems. Drawing on half a century of **customer-centric experience** in this field and on his painstaking attention to detail, has forged long-term relationships, based on mutual **trust** and **respect**, with Italian and international suppliers and customers. He runs the company in collaboration with his son **Alberto Dallan** and with **Diego Bergamin**, a technical specialist with extensive expertise in mechanical engineering.

# All-Italian quality with an international vision

Long-standing experience and extensive expertise enable Dalma to select the **best components** for high-performing machinery based entirely on **all-Italian mechanical technologies**. Hard work, a hunger for learning, a desire to aim high and expand its horizons: Dalma turns these deep-seated **values - typical of Italy, and of the Veneto region in particular**, the driving force of mechanical engineering innovation in our country - into cutting-edge solutions designed to meet the needs of the national and international market.

---

## A COMPETENT TEAM FOR SOLUTIONS THAT GO THE EXTRA MILE

Our **team of experts** draws on its extensive industry experience to develop **new solutions** designed specifically to meet our customers' production, technical and financial needs. A team with a common goal and a mind geared towards the future.

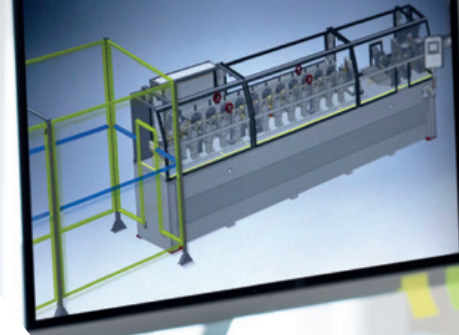

# From conception to customisation and implementation

Dalma's technical team of qualified experts designs and prototypes customised solutions by liaising continuously with the customer so as to fulfil his needs in full. Thus, **every idea is transformed into a concrete, high-performing** solution designed to **maximise productivity**.

Dalma tackles every project phase competently, precisely and efficiently from **conception** through to **design**, from **prototyping** through to **implementation**, from **testing** through to **after-sales support**.

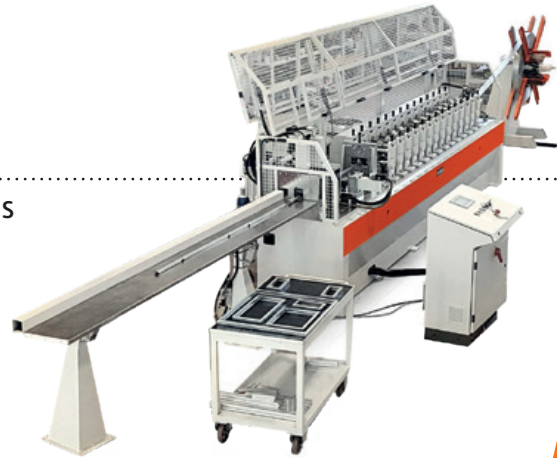

dalma

COMPANY PROFILE

ROLL FORMING MACHINES

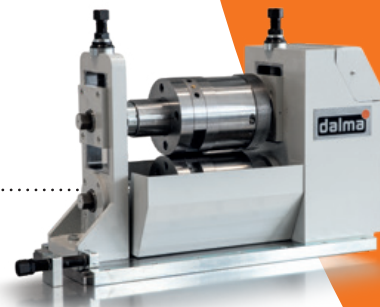

PACKAGING MACHINES

PUNCHING MACHINES

SPECIAL MACHINERY

# Roll forming, punching, packaging and special solutions.

Our machinery boasts state-of-the-art, safe and **reliable automation systems** meeting the high quality standards of **modern production**. Moreover, they are extremely compact and easy to use, as a result of Dalma's **user-centric approach** to producing individual machinery.

**Cutting-edge components, constant experimentation, engineering of construction details.**

These are just some of the ingredients that allow Dalma to build durable, flexible, easy-to-use, automated systems to streamline production, minimise machine downtime and waste, and improve energy efficiency.

# Solutions for sheet metal processing machinery and equipment

Why is Dalma your one-stop partner for processing sheet metal?

Dalma boasts a wide range of **systems meeting every production requirement** in terms of compactness, performance, flexibility and differentiation.

## Classic

A traditional model combining high performance and automation for a wide range of machining operations, thus streamlining production and minimising machine downtime.

## Simple

Practical and easy to use, these are extremely multifunctional models that implement a variety of processes. While conceived as basic models, their state-of-the-art features simplify operations with the greatest ease, efficiency and precision.

## Compact

Looking for high performance in a small machine? Our compact models meet even the most complex production needs, while optimising the production space available.

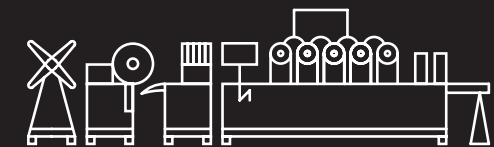

## Double

This type of solution stands out for its versatility. Simple and extremely practical to adjust, they enable machining with no width constraints.

## Combined

This solution, ensuring fast and differentiated production, comes with a vast range of optional extras enabling the production of complex profiles to be processed before and after roll forming. A solution meeting even the most demanding needs.

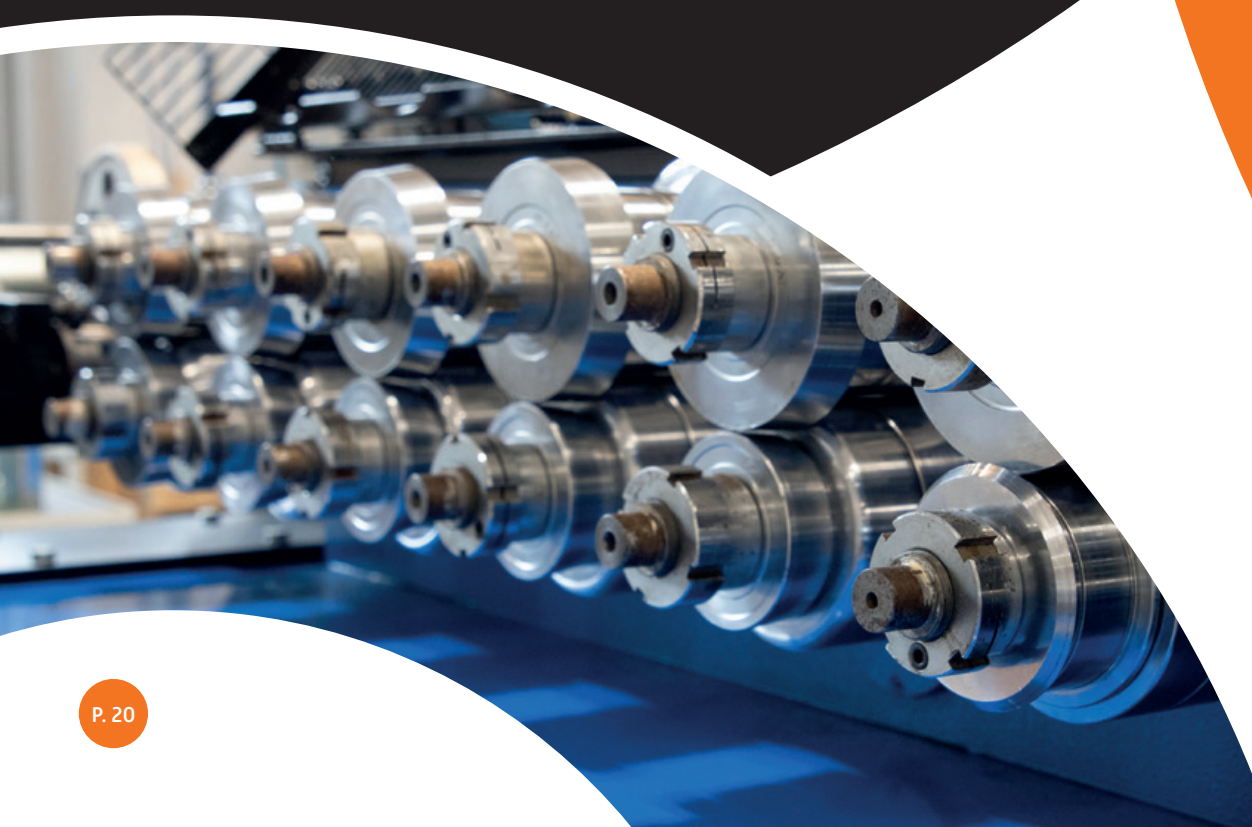

## RETROFITTING: FROM WEAKNESS TO STRENGTH

Even the most obsolete machinery can be regenerated and become the strong point of a highly dynamic and performing production system. Dalma **retrofits roll forming machines** so as to enable its customers to increase production in a cost-effective manner.

## A CUSTOMISED SERVICE FOR COMPANIES OF ALL SIZES

Drawing on the national and international experience of its specialised technicians, Dalma develops effective solutions across all borders. By carefully assessing the production details and goals of every project, and more besides, Dalma develops sheet metal machining systems that meet the needs of small, medium and large-sized companies alike.

# Solutions for every industry.

Dalma's systems are developed in accordance with the customer's specific needs and meet the highest quality standards. This allows us to meet the demands of small to large-sized businesses in a variety of industries.

BUILDING AND ACCESSORIES

INTERIOR AND EXTERIOR FINISHES

FURNITURE, DOORS AND WINDOWS

AIR TREATMENT

LIGHTING

AGRICULTURE

## At your side for all future challenges

### **Innovation, foresight e competence:**

these are the mainstays of Dalma's value proposition; the strategic resources leveraged to tackle the challenges of tomorrow, such as digitisation and **Industry 4.0**. No matter the challenge, we are always at your side.
